DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1 and 5-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kloess et al. (US 6,357,618) in view of Abu-Isa (US 6,395,357).

Kloess teaches a cover having a base wall **26**, a skirt **24**, a fuel tube **22**, and an unnumbered portion extending axially upwardly from the base wall.

Regarding claim 20, the base wall is attached to the fuel tank via a gasket **30**.

Although the cover is not explicitly stated to have a blade terminal, since it is a fuel module cover and applicant has stated blade terminals are part of a fuel module cover, the cover of Kloess is considered to have a blade terminal. Kloess does not teach a fuel permeation barrier layer.

Abu-Isa teaches it is known to provide a fuel permeation barrier layer of EVOH to a fuel tank and an associated cover assembly (see figure 2 depicting the barrier layer **34** sandwiched between other layers of the cover).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of a fuel permeation barrier layer to cover any desired area of the cover, and more specifically to the area between the base wall and the raised portion, of the tank cover assembly of Kloess. Doing so would ensure no vapors escape the closed tank.

Regarding claims 9 and 13, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the barrier layer of a thickness of approximately 0.2 mm to 2.0 mm, since this would have been a matter of design choice expedient for use with tanks containing fuel.

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 5-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. This Office action is made non-final in view of the new grounds of rejection.

5. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

6. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number (703) 872-7306 on the date shown below:

Typed or printed name of person signing this certificate
